

Position Statement on RoHS & WEEE Directives

Statement of Compliance on Directive 2002/95/EC of the European Parliament and the Council on the restriction of use of certain hazardous substances in electrical and electronic equipment (RoHS)

The Restriction of Hazardous Substances in Electrical and Electronic Equipment Directive was passed into law by the European Union. The directive includes products that contains lead, cadmium, mercury, hexavalent chrome, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE). After July 1, 2006 the use of these materials will be banned in new products sold in Europe.

Advanced Illumination is committed to comply with all applicable environmental, health and safety laws, regulations and standards as normal operating procedure. We at Ai are driven to produce quality products while reflecting our desire to protect people and the environment. Ai is aggressively identifying any materials used in our processes that could pose a potential hazard to our employees, customers or the environment.

To that end, we have completed our changeover to lead free soldering and are making RoHS compliant substitutions for all materials and components. Ai does not perform RoHS testing in house at this time but relies on response from suppliers for validation and compliancy information. The qualification of RoHS compliant components and materials used in our products and the implementation of new manufacturing processes related to this directive are on-going, with most products currently being compliant. It is expected that the balance of products will soon be compliant as we aggressively move to fully meet this responsibility.

This statement contains a listing of our standard product and it's current status under the RoHS directive. All current custom and/or special lights are manufactured to meet RoHS directive and are compliant.

Statement of Intent on Directive 2002/96/EC concerning The Waste Electrical and Electronics Equipment Directive (WEEE).

This directive targets the reduction of waste arising from electrical and electronic equipment when at the end of its life cycle. The directive requires equipment producers to finance any take-back program, recycling efforts or WEEE compliant disposal procedures.

The WEEE directive, which is currently being implemented in the EU, has considerable variation in the requirements across its 28 member states. Where we have producer responsibility under the WEEE Directive, it is the intent of Advanced Illumination to align itself with a national WEEE compliance scheme when legislation is finalized.

Currently Advanced Illumination has a "take back" program where end of life product may be sent back to Ai (at our expense) for recovery and proper recycling in the most environmentally friendly manner available to us. Upon requesting collection of end of life product, the customer shall relinquish all ownership and any legal or financial claims to such. The transfer of ownership shall take place when product is received by Advanced Illumination or an authorized agent.

Please contact Advanced Illumination when collection of end of life product is required and for further details on our take back program.

Product	Application	Status	Notes
AL4424	Linear Array Light	RoHS	All Variations
AL4554	Linear Array Light	RoHS	All Variations
