

Pulsar 710

High Current Strobe Controller

- Aii** 100 Amps @ 100 Volts total output in strobed mode;
8 Amps @ 24 Volts total output in constant mode.
- Aii** Provides fast rise times and high current pulses.

S710

P/N: S710

SignaTech software enables the user to program all strobe controller current and timing parameters. Currents are programmable for each of four channels, and expressed in amps from 0-25. Timing parameters include pulse width, and post event delay time. All timing parameters are programmed in steps of 1 microsecond, up to a maximum of 1000.

Signatech Controller Software

Dimensional Information

Additional Information

- 4 Channel output (independent current control on each output).
- Dual asynchronous triggering (non-differential mode).
- Multiple self test modes.

Standard Product Information

Operating Temperature: 0-40° C

Meets CE standards
